

TECHNICAL RIDER FULL HOUSE

LOCATION, MATERIAL & BUILD-UP

- Free and flat space of approximately 9m wide by 5m deep.
- 2 support staff when unloading and loading the van. 4 hours de muntatge
- 1 hour dismantling
- Table and chair for the musician: the table has to be big enough to fit the mixing board and a loop station (23x43cm). The chair must be without armrests.
- Dressing rooms for the five performers and the technician, close to the stage, with running water.
- Mineral water for the interpreters and the technician.

SOUND

- 1 monitor amplifier for the artists, focused to the stage.
- 1 sound board, with at least 6 channels, with *phantom* power.
- 1 audio cable with mini-jack connector to connect the sound board to the musician's smartphone.
- 1 microphone stand, boom type.
- 1 XLR cable with direct connection to the sound board, for connecting the musician's microphone.
- 2 Big Jack cables with direct connection to the sound board, for the musician's loop station.
- 1 DI-BOX to connect the soundboard and the player's ukulele.
- The sound board has to be placed on stage, so that it can be controlled by the musician himself.

ILLUMINATION

- 17 PC type projectors with blades
- 7 Source Four Zoom 25°-50° type projectors
- Light board with the ability to make up to 25 memories
- Dimmer with 24 channels

Company technician: Guillaume Cayla-Zene
